# Overview

This is a living document. It will evolve as we further develop our brand, our product, and our relationship with users and partners.

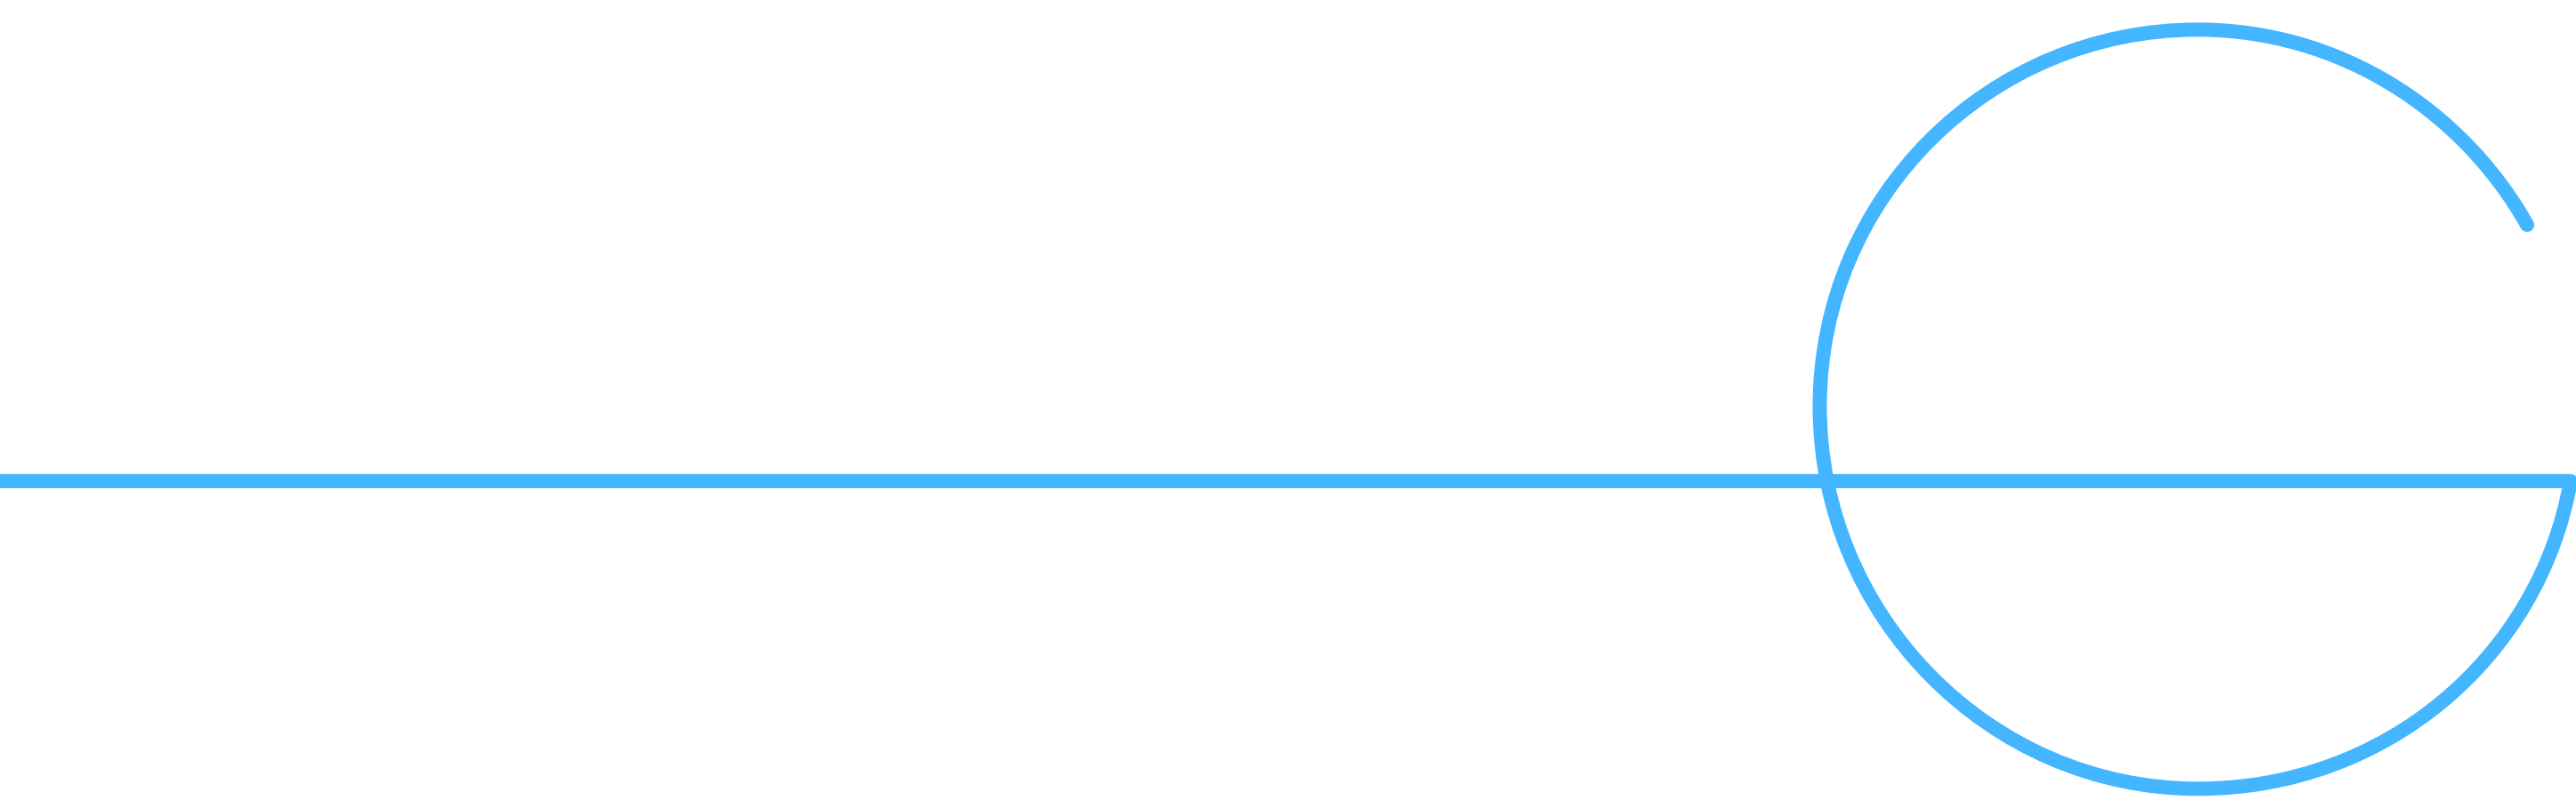

Gone new design should mirror the aspirations we hope to share with our users – a smarter, less distracted, more deliberate, cleaner, and controlled lifestyle. Gone is the end to buyer's remorse, because it's the beginning of seller's choice.

Thin lines, white space, deliberate use of color and imagery create a mental image of exactly this lifestyle. Through this, our users will be encouraged to participate not only by suggestion, but with excitement.

Please take a moment to understand how the guidelines on the following pages convey why Gone is the best choice for our users.

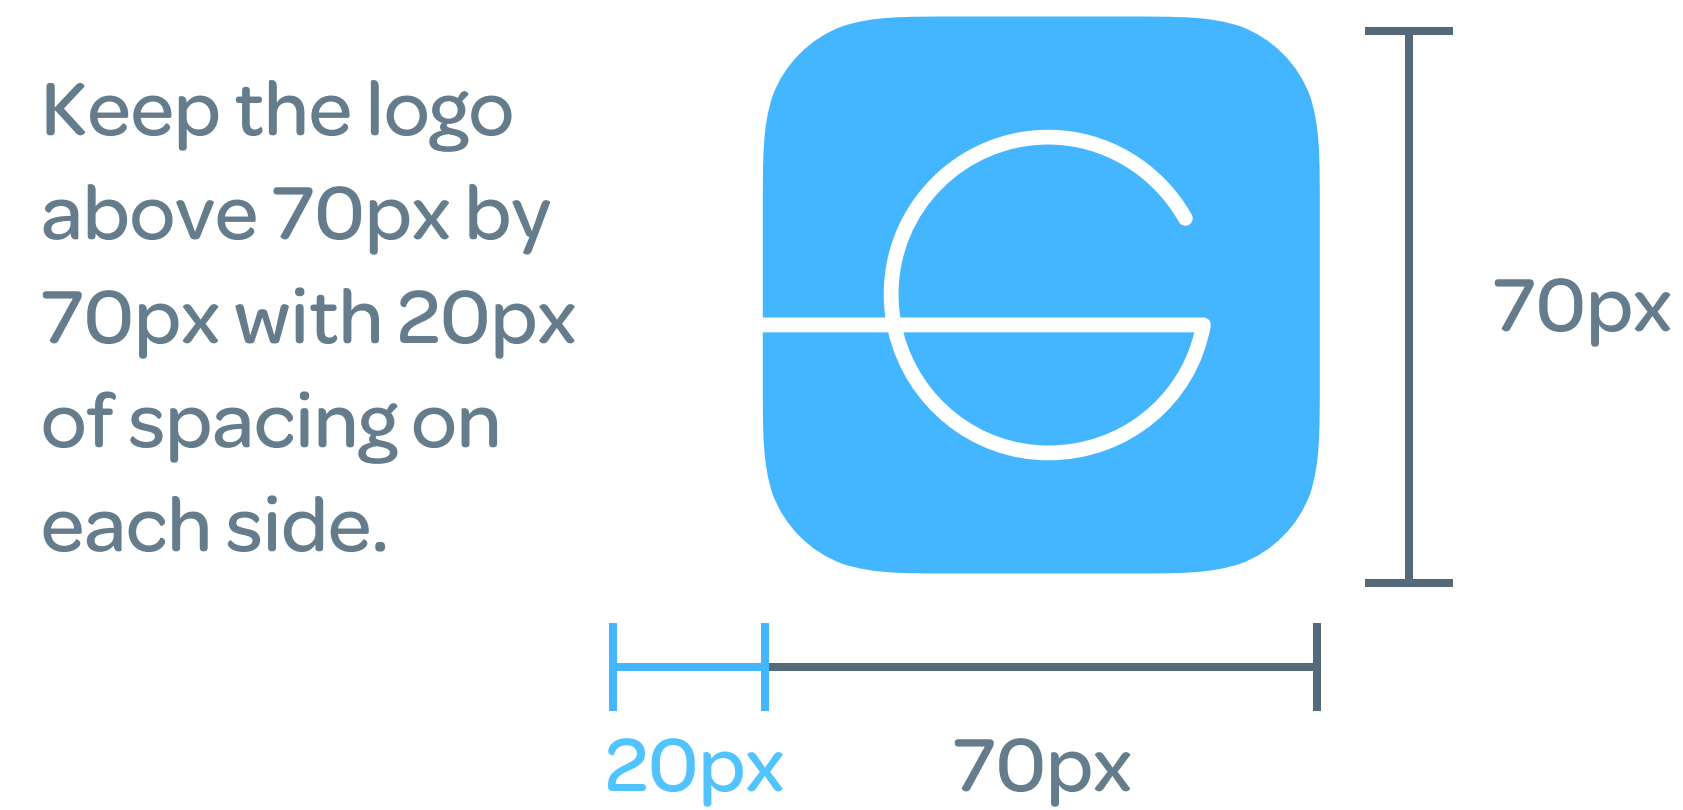

G Emblem

G Loop

# The Gone G

The Gone G is the fundamental logo. In most cases, the emblem version should be used, but there can be flexibility.

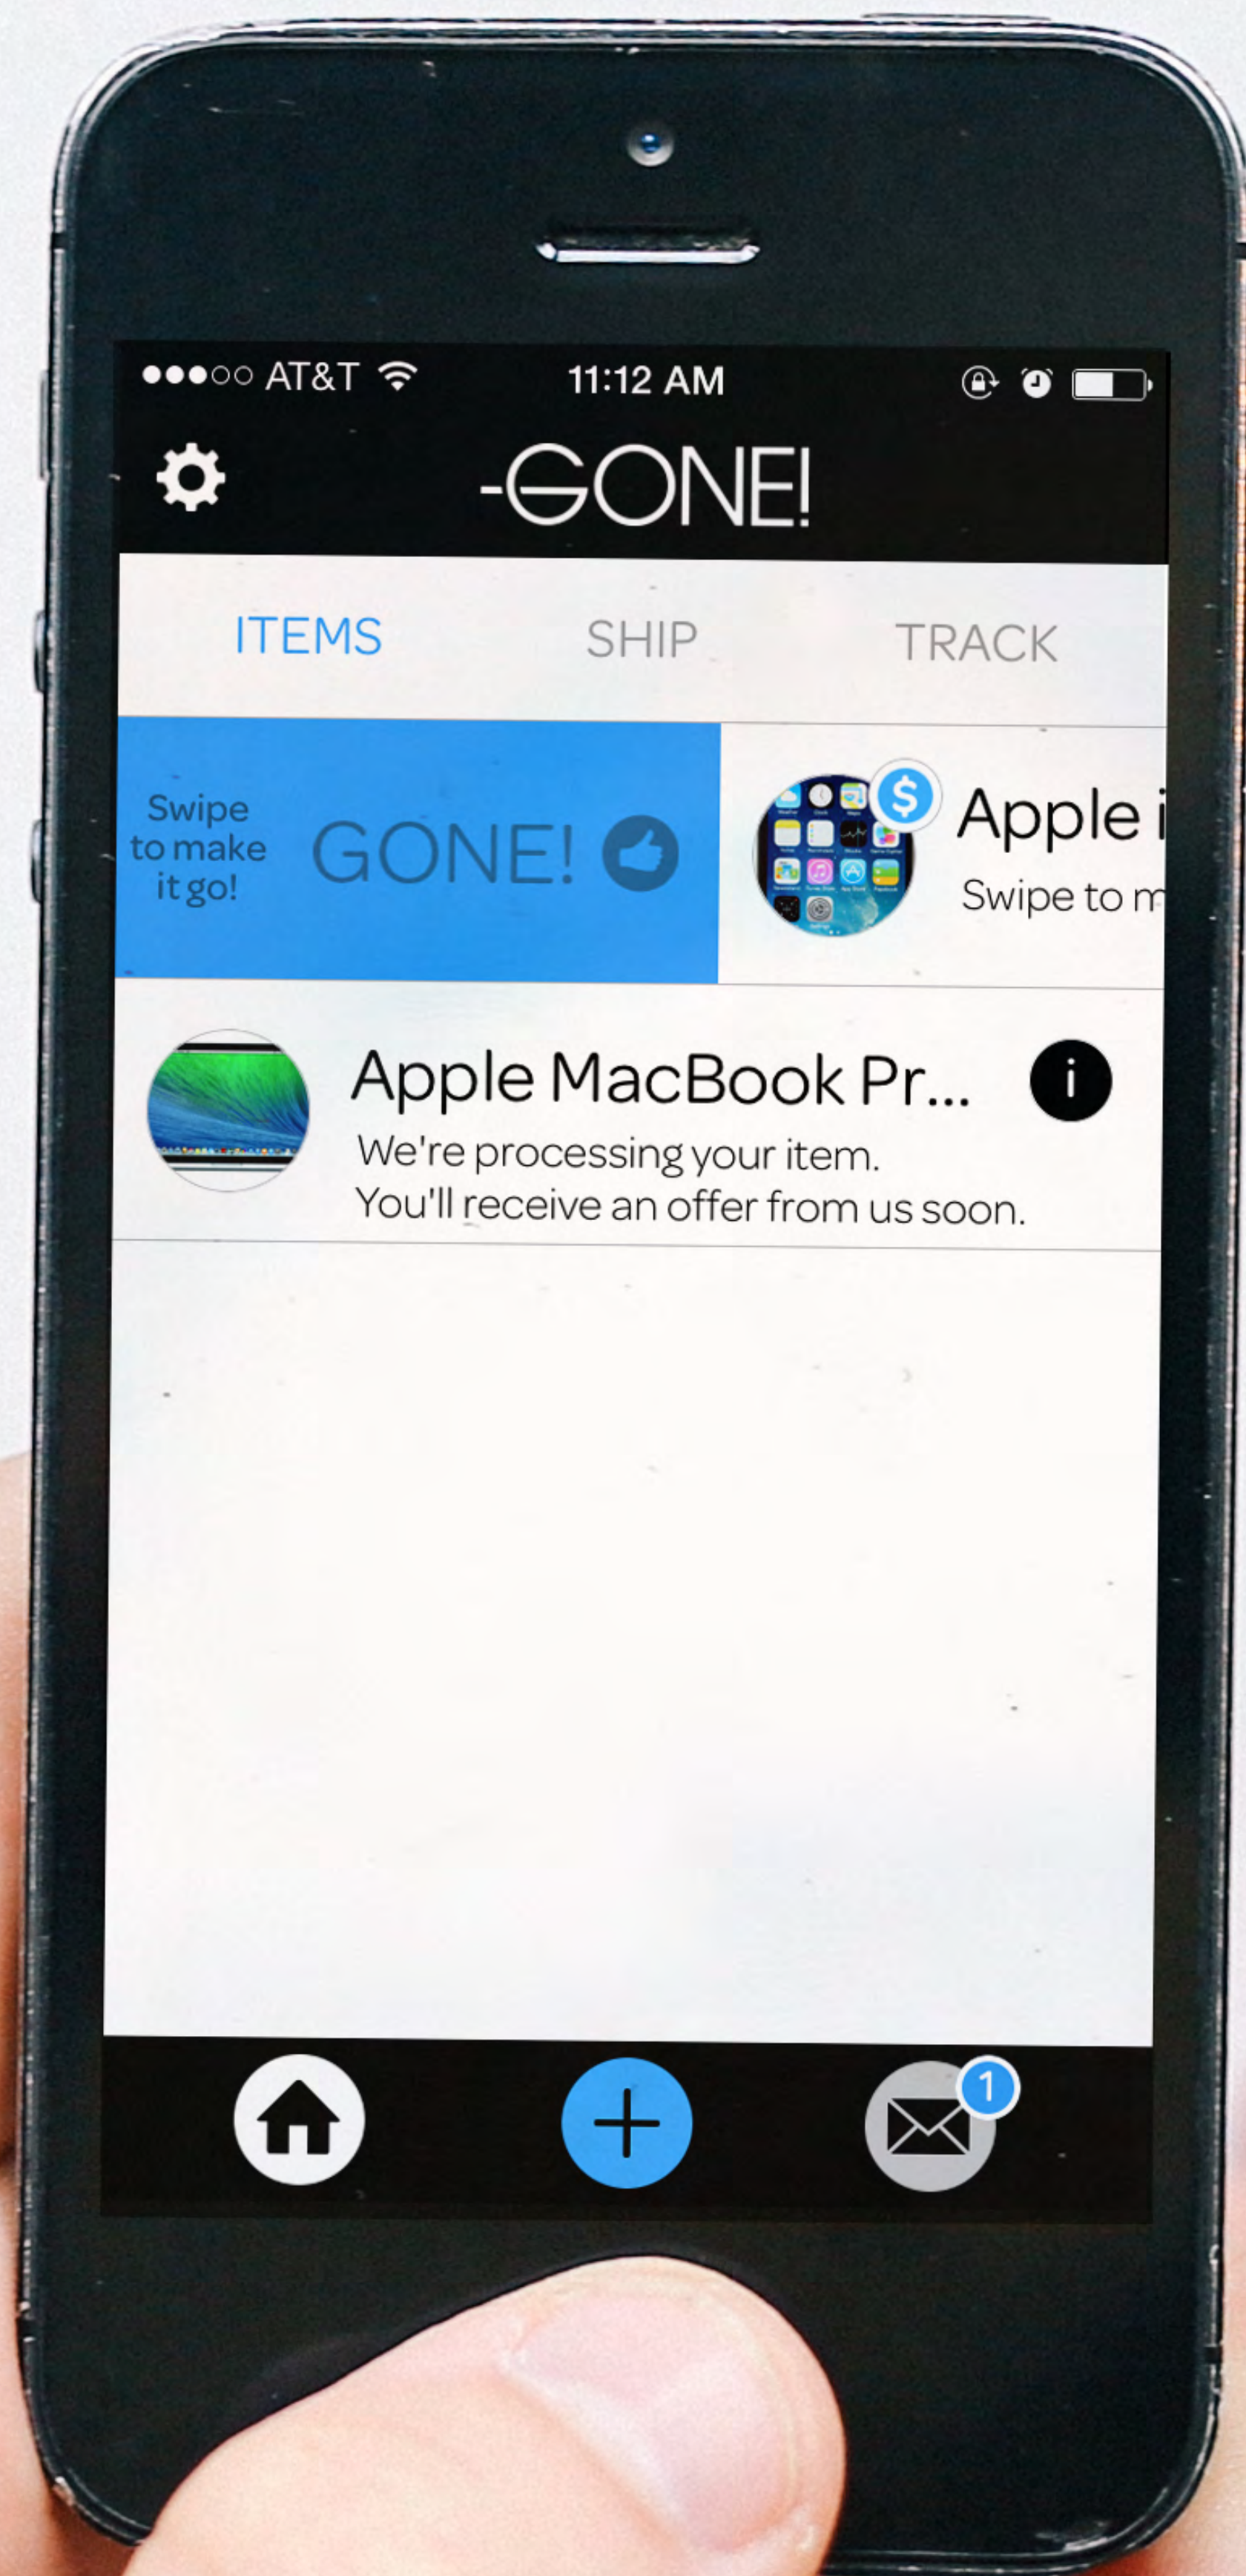

Use the blue G emblem when placing the logo on a white background.

Use the white G emblem when placing the logo over colors or darker images.

Avoid using images that are too busy, it should be easy to see the logo.

Omnes

## Gone's brand typeface

At most sizes, Omnes is a font that blends cleanliness with a playful rounded character. Reduced to thin strokes, Omnes's playfulness becomes precise yet remains approachable and trustworthy. In this form, Omnes represents Gone.

## Typography Guidelines

Use the suggestions on the right as a starting point for thin stroke weights. Try to apply a 130% line height to text.

If Omnes is **not available**, look for Gotham and use similar weights. If neither is available, Helvetica or Open Sans will do. Aileron Thin is a good alternative when using Canva.

These are Gone’s principle brand colors  
. Take a moment to get to know why & when to use each.
